

GRENADE LAUNCHER | 2018

Devon Global LLC was established in 2014 as a manufacturer of modern combat and sniper rifles. Our unremitting pursuit of high-quality firearms delivers precise design, absolute reliability, consistent accuracy, and extreme durability to warfighters and law enforcement officers. Designed, machined, and assembled entirely in the USA, our firearms do not just meet the requirements and expectations of our customers, they will feel the difference form, fit and function, built just right.

Devon Global is proud to have two brands, Devon Defense and Dragonov. Through the application of modern materials science, creative engineering, and advanced manufacturing processes, Devon Defense was designed with revolutionary new features while maintaining the basic M4/M16 architecture that has served U.S. armed forces well for the past 40 years. Devon Defense delivers best-in-class design, outstanding ergonomics, and flawless functionality. Dragonov stands for the best modern sniper and hunting rifles that are consistency, reliability and high performance. Each Dragonov rifle is carefully assembled by a single engineer, and each individual barrel is visually inspected. Each Dragonov rifle then goes through manual accuracy testing to confirm that the rifle can perform under 1MOA accuracy. If you want something done right, you have to do it yourself. Our gas piston system and barrel are the core that we build our rifles around. Devon Global designs and engineers its own short-stroke gas piston system and also manufactures its own cold hammer-forged barrels out of 41V45 alloy. The piston system and barrel stand up better than competitors to precision and extreme use, which means that our customers see a lower loss in accuracy and velocity as the round count increases.

At Devon Global, we are constantly combining the newest technologies with the customers' expectations to bring military, law enforcement, and hunters the most durable and reliable rifles possible. From design and machining to assembly and shipping, we are skilled and our methods are meticulous and efficient. All of our rifles are made in the U.S.A., and we are all proud to offer our customers the finest rifles in the world.
